## Sandstone

### Product Information

Teakwood

Blue Ice

#### Description

Sandstone is one of the most common types of sedimentary rock and is found in sedimentary basins throughout the world. It is often mined for use as a construction material or as a raw material used in manufacturing. It comes in a variety of different colors and textures which makes it a great choice for any landscape project

**Flagging:** Is 1” thick and is available in 1’ x 1’ up to 2’ x 3’

(1/2” undersized to allow for a mortar joint)

**Coping/Tread:** Is 2” thick and available in 12”, 14”, 18” & 24” widths x 6’ & 8’ lengths , with a rock face front edge.

**Availability:** Sandstone flagging is stocked in a 3 size pattern 1’ x 2’, 2’ x 2’ & 2’ x 3’

Sandstone treads are stocked in 12” x 6’ & 8’ — 18” x 6’ & 8’

Other sizes are available by special order.

Rainbow

**Note:** Natural Stone varies in color, texture and shades. It also contains varying amounts of markings, striation, lines and inclusions. Workmanship, lighting and mortar joints are just some of the other factors that can affect the final appearance of the stone. The pictures above should only be used as a guide. Please ask to see a physical sample before ordering.
